Professional Summary

Growth and marketing leader who consistently moves from execution into ownership: given a brand, a portfolio, or a product to grow, I set the strategy, build the roadmap, and drive it end to end rather than waiting to be handed one. Background spans full-funnel e-commerce growth (paid acquisition, CRO, lifecycle), B2B SaaS go-to-market, and the marketing operations and AI-enabled systems that scale a strategy once it's set. I pair that with direct, hands-on execution -- I write the SOPs, run the audits, and build the systems myself -- so the strategy I set is one I can also ship.
